Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 14, 2005 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1, 3, 4, 6, 7, and 10-27 are currently pending.
4. In the reply filed on October 20, 2004, applicant elected of Group I and vitamins for species A without traverse.
5. Claims 14-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 20, 2004.
6. Claims 1, 3, 4, 6, 7, and 10-13 are examined on the merits.

Claim Rejections - 35 USC § 103

7. Claims 1, 3, 4, 6, 7, and 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Betterlife.com (www.betterlife.com/prod_home_page.asp?prod_if=7465 (Copyright 2001)), US Pat. No. 5,977,073 and US Pat. No. 6,592,908 for the reasons set forth in the Office action of June 14, 2005.

Art Unit: 1655

All of applicant's arguments regarding this ground of rejection have been fully considered but are not persuasive. Applicant argues that the art does not provide sufficient motivation to combine the claimed ingredients together. Applicant argues that the references only teach that it would be "obvious to try" to combine the claimed ingredients together. However, as discussed in the Office action of June 14, 2005, all of the claimed ingredients are known in the art to be used for the same purpose. As discussed in MPEP section 2144.06, it is known in the art to combine ingredients together when they are all known in the art to have equivalent purposes. "It is prima facie obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition to be used for the very same purpose.... [T]he idea of combining them flows logically from their having been individually taught in the prior art." In re Kerkhoven, 626 F.2d 846, 850, 205 USPQ 1069, 1072 (CCPA 1980). Thus, the prior art is considered to provide sufficient motivation for combination and a reasonable expectation that such a combination would result in a successful product.

Applicant also argues that the prior art does not teach creating a composition that is used for alleviating the symptoms of upper intestinal discomfort. However, this is a recitation of intended use. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. Since the combination of the prior art teaches a composition that is structurally the same as the claimed invention, the prior art composition would intrinsically possess the same properties as the claimed composition.
